CONCLUSION:

We tested five databases:

e-Search Plus and **TMview** databases are both administered by the EUIPO; the difference between them is that TMview also includes trademarks outside the EU. Both databases enable searching by words and images to determine verbal or pictorial similarity. The same as with patents, when we are applying for a trademark, we have to do a state-of-the-art search, in order to check whether there are any trademarks similar to our proposed trademark already in force. Since trademarks are geographically limited, it is also very important to review national databases. For example, if we want to apply for a trademark in China, there is a possibility we will not find this trademark in the TMview or the Global brand database. National databases mostly do not support image searching and are sometimes limited to national language only or, at the very least, have very poor English translations. The lack of analytical and additional functionalities also means that there is very little help these databases and websites can provide to someone looking to analyse trends, procedures, etc.

1. e-Search plus (EUIPO)

1.1. Search engine functions:

BASIC SEARCH

Searches through trademarks, designs, owners, representatives, bulletins and office decisions. Search by name, keywords,... Allows searching by image.

ADVANCED SEARCH

Allows combining search fields with the boolean operators AND, OR and/or NOT. Allows searching by keyword, (trademark and/or owner) name, representative, type, status (EUTM or IR), kind of mark, Vienna and Nice classification or date of filing. Allows searching by image.

By:

- TM information: TM representation (image), TM number, TM name, TM type, TM basis, TM description, reference, recordal number, TM status (EUTM), TM status (IR), acquired distinctiveness, kind of mark.
- TM classification: Vienna class., Nice class., goods and services, publication section.
- Dates: filing date, registration date, expiry date, publication date.
- Owners and representatives: owner ID number, owner name, representative ID number, representative name.
- Office decisions: opposition number, opponent name, opponent ID, opponent representative ID, opponent's representative's name, appeal number, cancellation number.

1.2. Analytics functions:

A graphic representation of a timeline (dates from EUTM application received, publication registration to expiration date); but NO analytics or statistical reports.

1.3. Additional functions: yes

2. Global brand database (WIPO)

2.1. Search engine functions:

QUICK SEARCH

Allows fuzzy search, truncation and boolean logic

By: brand name, brand owner, brand number

FIND BY BRAND NAME

Allows the use of simple words as well as complex phrases to find similarities.

By: brand name [exact, fuzzy, phonetic, embedded, stemming], owner name, designation (country), Nice classification, goods and services

FIND BY BRAND LOGO

Allows uploading of images to search for similarities.

By: image [conceptual similarity, shape similarity, colour similarity, composite similarity], Vienna classification, US design classification, owner name, designation (country), Nice classification, goods and services

FIND BY GOODS AND SERVICES

By: goods and services [toggle: match exact expression], IP office [toggle: only records younger than (select time period)], status (registered, ended, pending, expired, unknown)

EXPLORE

Provides statistical information either for the entire database or for a specific search.

Users can simply click through provided filters and categories to find the desired information.

2.2. Analytics functions:

Offers a range of analytics tools to help users analyse trademark data and trends, including: statistical reports, analyse citation data for trademarks, and map view that enables users to view the geographic distribution of trademark registrations across different countries and regions.

2.3. Additional functions:

- **Advanced Search:** GBD offers a powerful search engine that enables users to search for trademarks from over 120 countries worldwide based on various criteria, such as trademark name, owner name, registration date, and more.
- **Legal Status:** The database provides information on the legal status of trademarks, including information on their registration, renewal, and cancellation.
- **Image Viewer:** GBD allows users to view trademark images, including logos and other visual representations, through its image viewer.
- **Alerts:** GBD offers an alert feature that enables users to receive notifications when new trademarks that meet their search criteria are added to the database.

Database search page:

The screenshot shows the WIPO Global Brand Database search results for the keyword 'solar panel'. The search criteria are 'Brand name : orthographically resembles 'solar panel''. The results are displayed in a grid format, showing 13 different trademark entries. Each entry includes a logo, the trademark name, the owner's name, the IP type (e.g., National Trademark Application, National Trademark Registration), the designation country, the status (e.g., Ended, Pending, Registered), the registration number, and the Nice class (9). The trademarks include 'EP SOLAR PANEL CLEANER', 'EP INTEGRATED SOLAR PANEL', 'SOLAR PANEL', 'SOLAR PANEL CLEANER', 'SOLAR PANEL', 'SOLAR FOLDING PANEL', 'SOLAR PANEL PROJECTS', 'SOLAR PANEL PROJECTS', 'POCKETSUN SOLAR PANEL', 'Solar Magic Panel', 'MANNING SOLAR PANEL', and 'Floating Solar Panel'.
